EDUCATION

California Polytechnic State University | San Luis Obispo, CA

Expected Graduation: May 2029

B.S. in Computer Science

GPA: 3.67

Relevant Courses: Data Structures, Intro to Computer Organization, Systems Programming, Linear Analysis

TECHNICAL SKILLS

Languages: Java, TypeScript, Python, HTML, C, Assembly

Technologies: React, React Native, Expo, Node.js, Convex, MongoDB, Supabase

Developer Tools: Git, GitHub, Vercel

TECHNICAL EXPERIENCE

CodeBox Software Developer (Poly Buys)

Sep. 2025 - May 2026

- Developed features for a student marketplace app with 175+ users using React Native, TypeScript, and Convex
- Built secure, real-time buyer-seller messaging, including inbox, chat, read receipts, reporting, and conversation hiding
- Implemented tag-based listing filters and hidden-content handling across feeds, listing pages, and owner views
- Added profile-picture uploads and mobile-only prompts that keep web users in browse-only mode

Hack4Impact Software Developer (One Cool Earth)

Sep. 2025 - May 2026

- Developed volunteer and admin event-management interfaces with sorting, status indicators, and event-detail navigation
- Created a sign-up interface for minors with parent/guardian fields, password requirements, and responsive styling
- Researched and implemented Jotform waiver verification using an API route, email matching, and MongoDB
- Enhanced the calendar experience with a mobile-responsive redesign and expandable components

PROJECTS

PolyPassengers | *React Native, TypeScript, Expo, Supabase*

Sep. 2026

- Built a Cal Poly rideshare app enabling drivers to post rides and riders to browse, join, and request rides
- Integrated Supabase for live ride data and user-linked memberships
- Added ride departure times, cost-share display, pull-to-refresh, and loading/error states
- Built a named-passenger view so drivers can see riders who joined each ride

Personal Website | *TypeScript, React, Node.js, MongoDB*

Sep. 2025

- Created a personal website using HTML and CSS, then rebuilt it with TypeScript, React, and Node.js
- Designed and developed multiple pages including blogs, a project portfolio, and a personal resume
- Implemented a navbar to provide seamless navigation across pages
- Integrated MongoDB to store portfolio projects and blog posts, enabling dynamic content updates

WORK EXPERIENCE

Fall City Floating | Outdoor Crew & Shuttle Driver

June - Sep. 2024 - 2026

- Supported 500+ daily customers across six sites with equipment usage, river safety, and shuttle operations
- Safely transported customers and equipment across six sites and maintained shuttle statistics
- Maintained cleanliness and safety standards and managed online booking through Peek Pro
- Coordinated daily across three departments to complete shared operations
